Project risk

management is the process of identifying, analyzing and then responding to any risk that arises over the life cycle of a project to help the project remain on track and meet its goal.

## **The Risk Management Process in Project Management ...**

For our purposes,

# Download Free Project Management Risk Analysis

project risk analysis is done two ways, qualitative risk analysis, and quantitative risk analysis. The latter is where a score or weight is assigned to each risk based on probability and potential impact, so it is known if further management is necessary. This is put into a Risk Register (see example below).
